

REAL MONEY CASINO GAMES

Why Casinos Provide Free Games

There is a great deal of competition around between online casinos. Online casinos are always trying to find new and innovative bonuses and promotions to offer players as a way of encouraging new players to join the site and current customers to remain at the site. One of the ways that they do this is by providing free games. These come in many shapes and forms including no deposit bonuses, fun mode, free slots spins and more. Most of the promotional offers and casino bonuses have restrictions placed on them, either in terms of the winnings that you can collect or the time you can play, although free games in the form of a casino bonus are useful in that you can generally keep your winnings.

Reasons to Play Free Casino Games

Free casino games are an excellent way for players to trial the casino, its software and its games. They are also a way for players to practice their game play and improve their strategy. All of this can be done through free casino games without players having to risk any of their own money doing so.

Fun Mode at an Online Casino

Most online casinos offer what is known as fun mode. Players can choose to play in fun mode when they sign up to an online casino. This mode allows players to play for as long as they like without having to spend any money of their own. The biggest catch with fun mode is that while you do not spend any real money to play, you cannot win any real money either. All of your "winnings" are virtual winnings.

How do I Know When I am ready to Move to Real Money Games?

Knowing when to move to real money games is very subjective and it depends on the reasons why you are playing in fun mode in the first place. If you are playing in fun mode to trial the casino and the software, then as soon as you feel that you have tried enough games and you are satisfied to make a decision on whether or not you like the casino, you can either choose not to play there any longer or to switch to real money mode. If you are playing in fun mode in order to practice your game and improve your strategy, you can play until you feel confident enough in your game play to spend you own money on the game.

Once you've Moved to Real Money Play

Players must be aware that generally once you move over from free play or fun mode to real money mode at the casino, you are not able to move back again. The switch from fun mode to real money can be done at any time, but you cannot go back once you have made the decision. It is therefore important to think carefully about the reasons why you chose to play in fun mode and to make sure that you have fulfilled your objectives before you move over.
